# The gardening tool from Germany

Handcrafted tools with character – without plastic, without toxic substances.

# Tradition is not the holding of ashes, but the passing on the flame.

Thomas Morus

For eight generations, the forge 'Guttenbergerhammer' has been a family business. Passed down time and again to the son, carrying with it all the experiences and secrets of a life as a blacksmith. And always under the name that stands for unadulterated craftsmanship: Krumpholz.

Find out more about our history:  
[www.krumpholz1799.de/225-jahre](http://www.krumpholz1799.de/225-jahre)

# Created by masters, destined for the future.

## The Guttenbergerhammer

Cool and deep in the quiet bottom it dreams at the edge of the stream,  
Trees stand in the round, building a green wall.  
From the half-darkness of the forge, the glow of the fire shines brightly,  
Ring-sound! Ring-ring-ring! Twinkling light ... The boys' song mingles with it.

A tradition of quality since 1799.

**KRUMPHOLZ**®  
Werkzeugfabrikation seit 1799

## Timeless quality for 225 years

Dear friends of gardening,

for 225 years, our goal at Krumpholz Tools has been to unite the passion for gardens and craftsmanship. It's been a journey spanning generations, inspiring us to honor our ancestors' legacy while propelling innovation forward.

Our roots delve deep into the history of our family and craft. Since 1799, we've been dedicated to tradition – a tradition based on quality, precision, and an unwavering belief in craftsmanship. These principles are embedded in every tool leaving our workshop, carrying the heritage of our 225-year history.

Therefore, our new product catalog is more than just a collection of tools. It's a tribute to the art of craftsmanship captured in every hammer, hoe, and spade. Each tool has

been meticulously crafted not only to meet our customers' needs but also to carry forward the tradition they represent.

In a world of constant change, we've upheld our values. We've harmoniously blended tradition and innovation to create tools that are not just functional but also tell stories. Stories of dedication, expertise, and an inheritance shaped across many generations.

It fills me with pride to present to you our new product catalog. Dive in and discover tools that will not only nurture plant growth but also ignite your own passion for gardening.

With gratitude for your continued trust and support throughout our 225-year journey.

With best regards from Upper Franconia,  
Claus Krumpholz

[www.krumpholz1799.de/225-jahre](http://www.krumpholz1799.de/225-jahre)

## Quality by tradition: Family-run since 1799

**The Krumpholz family can look back on 225 years of experience in the manufacture of high-quality hand tools, making the company one of the oldest family-run craft businesses in Europe.**

Real gardening clothes, a firm grip and the aromatic humus scent of the garden soil - no plastic handle or gardening tool made of cheap sheet metal is a good match!

Gardening tools from Krumpholz are gardening tools made of real grit. You can see that at first glance. You can feel it with the first touch. Hard-wearing ash handles, hard hickory wood and fire-forged iron parts - that's how you build gardening tools of real value. Gardening tools that last. Also what the Krumpholz brand promises: traditional forging quality.

This forge is called „Guttenbergerhammer“. It is located in Upper Franconia, close to the famous beer town of Kulmbach and tucked away in the deep Franconian Forest. On

the banks of the large and small Rehbach streams, with the help of which the company's own generator produces the electricity for the entire operation.

### Genuine workmanship

The „Guttenbergerhammer“ forge has been a family business for eight generations, always passed on to the son - along with all the experience and secrets of a long life as a blacksmith at the anvil and forge. Since 1799, and always under the proud name that stands for unadulterated quality workmanship: Krumpholz.

Even today, tools are still produced here in this blacksmith's forge in handcrafted work that you don't just buy. You buy

A tradition of quality since 1799.

them. You invest in them. Because they accompany seasonal garden life for decades - and are passed on to the next generation of gardeners. Old garden tools are among them, such as dandelion pruners and bulb planters. New gardening tools have been added: Practical items such as sporks and garden disks.

And all of them are born from the heat of the blue-lame embers, from the power of the shaping blacksmith's hammer and from the unconditional will to produce nothing but solid quality.

### The Guttenbergerhammer through the ages

Take a moment to look at these pictures: They show you the traditional Guttenbergerhammer, a forge in the Franconian Forest that is renowned among connoisseurs and whose foundation dates back to the Middle Ages.

It has been owned by the Krumpholz family since 1799. Passed down from father to son time and again, seven generations have lived and worked here as blacksmiths without exception - right up to the present day. What a wealth of experience, which to this day accounts for the high quality of our forged products, which are coveted throughout Europe! That is why even today, nothing but values are created in the Guttenberger Hammer - for people with values!

### COLLABORATION BETWEEN THREE GENERATIONS

Since Johann David Krumpholz acquired the business in the Guttenberg hammer in 1799, it has been passed on from generation to generation. Today, three generations work together towards one goal: the production of tools of the highest forging quality. The picture above left shows the family with company owner Claus Krumpholz, his wife Elke, his father Georg and his son Claus Georg.

The Krumpholz family can look back on over 200 years of experience and tradition in the manufacture of high-quality hand tools. In 1799, Johann David Krumpholz acquired the business in Guttenberg Hammer in Upper Franconia. The hammer had been in existence for much longer and had been a well-known ironworks and armory for centuries before.

When it was taken over by the Krumpholz family, it became a factory for the manufacture of hand tools. This tradition has been preserved to this day.

# Since 1799 in family ownership

# Our company history

## Review of our company anniversary

**From forge to world-renowned company: The specialist for high-quality gardening, forestry and construction tools has been around for 220 years.**

In 2019, Krumpholz-Werkzeuge celebrated its 220th anniversary with extensive festivities. The manufacturer of high-quality gardening, forestry and construction tools invited guests to the inauguration of its new production hall - and around 300 guests accepted the invitation from the Grafengehaig-based company.

These included guests of honor from politics and business, including Werner Burger, Mayor of Grafengehaig, Klaus-Peter Söllner, District Administrator of Kulmbach, Thomas Zimmer, the President of the Chamber of Crafts for Upper Franconia, Henry Schramm, District President and Mayor of Kulmbach, Silke Launert, Member of the State Parliament, Heidrun Hemme, Pastor of the Grafengehaig market, who will also dedicate the forge, Michael Möschel, President of the Kulmbach Chamber of Industry and Commerce and Andrej Kupetz, Managing Director of the German Design Council.

„It is wonderful to receive such appreciation from all sides for the work and passion that our family has brought to this

company for generations,” commented owner Claus Krumpholz on the great response to the event. The large presence of well-known personalities is no surprise, as Krumpholz is a very special company. On the one hand, it is known for the design and further development of innovative and sustainable tools and for its many new products and patents beyond the country's borders.

The fact that Krumpholz is not only known to professional and amateur gardeners is also due to the history of the Grafengehaiger company: Krumpholz is one of the oldest family-run companies in Europe - the company has been producing for 220 years, now in its eighth generation - and stands for quality „made in Germany“ worldwide. The company's ties to its home region are also second to none.

„We have been producing in Upper Franconia since the company was founded - and our family has lived the Krumpholz brand for just as long,” says Claus Krumpholz. In 1799, Johann David Krumpholz acquired the company in Guttenberg Hammer, which had been a world-famous

ironworks and armory for centuries before. Krumpholz took the anniversary as an opportunity to inaugurate the largest investment in the company's history, the addition of a new production hall. The extension has almost doubled the storage and production area. An investment that was necessary, as the product range has continuously expanded in recent years.

This was also the case after 2008, when Krumpholz decided to position itself as a supplier of exclusive, high-quality design tools. „For us, this was the logical and necessary step in our development: away from a ‚cheap is cool‘ mentality towards sustainable quality,” continues owner Claus Krumpholz.

His son Claus Krumpholz Jun. who now represents the eighth generation, has already indicated that he will continue on this successful path.

Sustainability in the truest sense of the word is certainly also the reason why the Krumpholz brand has received several awards (such as the „German Brand Award“, the

TASPO „Manufacturer of the Year“ award and the „Brand of the Century“ title): For all its tradition, contemporary issues such as resource conservation and environmental compatibility are also high on the agenda at Krumpholz. For example, the power of two adjacent streams is used to generate energy by means of two turbines, which supplies the company and the residential building. The surplus electricity is fed into the grid.

By using the renewable energy source of hydropower, the forge can therefore produce self-sufficiently, with a secure supply and low carbon dioxide emissions at all times. Krumpholz also uses only natural materials for its tools, and no plastic. The wood for the handles is FSC-certified - i.e. from environmentally friendly, socially beneficial and economically viable forest management.

For Claus Krumpholz, this commitment shows one thing above all: „The Krumpholz company looks back on an eventful and great past, and that is exactly what is in the foreground these days - but we are also well prepared for the future.“

## Artisan blacksmithing for generations

**Spades, shovels and hatchets - Krumpholz-Werkzeuge makes a wide range of products. And they are all born from the heat of the blue-sludge embers, the power of the forging hammer and countless manual operations.**

For 225 years, the name Krumpholz has stood for hand-made tools of the highest quality. The family business has dedicated itself to the art of forging for generations and has become synonymous with excellent gardening tools "Made in Germany".

### **Tools "Made in Germany" for special requirements**

In our blacksmith's shop, tools are created by hand that you don't just buy. You acquire them. You invest in them. Because they accompany seasonal garden life for decades

- and are passed on to the next generation of gardeners.

Sooner or later, anyone who has been gardening for a long time will certainly experience how annoying it is when the first heavy load on a standard spade breaks the handle or the joints between different materials give way. But for the special requirements of forestry, gardening and landscaping, you need tools that guarantee a long service life.

That is why every one of our tools is hand-forged from first-class carbon steel and is still produced today through

A tradition of quality since 1799.

countless manual operations. But it is precisely this that guarantees the special quality of our tools. Our aim is to combine the highest level of quality with a wide range of products. The material is thoroughly kneaded during forging and the structure is compacted, which increases the

## **We have set ourselves the task of designing innovative and sustainable tools.**

strength. By processing at very high temperatures, the desired shape changes can be achieved without major material losses.

### **Know-how meets selected materials ...**

The individual metal parts are forged by hand. This requires skilled workers who know, understand and can assess their working material. This is the only way to create high-quality products with high aesthetics and resilience. The be-all and end-all in the manufacture of our tools is the exclusive use of selected materials.

Sturdy metal parts are manufactured from high-quality alloyed steels, whereby first-class workpiece properties are achieved. This has the advantage that each tool is ideally equipped for its specific tasks.

### **... and ensures a lifetime of pleasure with the tool**

Everything is hand-finished and thoroughly checked in our forge. A standard that enables us to offer a lifetime guarantee against material or manufacturing defects. Because our aim is to combine the highest quality with a wide range of products.

### **Innovations inspired by people**

We have set ourselves the task of designing and developing innovative and sustainable tools. To date, many innovations and patents from Krumpholz have made the demands of professional and amateur gardeners tangible, as our products are developed from generation to generation. The combination of experience and willingness to innovate

forms the basis of our tool production. This is constantly being further developed to meet the highest demands of the quality-conscious gardener and professional forestry worker. Our tools are designed not only to work efficiently, but also to support the natural movements of the human body.

#### Combining tradition and innovation

Krumpholz tools stand for the heritage of tradition, the beauty of the art of forging and the functionality of

high-quality gardening tools. By combining tradition and innovation, they have established themselves as indispensable companions for professionals and hobby gardeners who demand the highest standards from their tools at all times.

With this approach, we want to embody the perfect balance between tradition and innovation in the manufacture of high-quality tools. Our approach masterfully combines traditional craftsmanship with state-of-the-art production

methods. In the midst of an ultra-modern production facility, there are also master craftsmen whose skillful handiwork gives each tool its uniqueness.

#### Individual tools with a unique soul of their own

By using modern laser technology, we can add a personal touch to each tool, giving each piece a unique identity. This individual marking offers, among other things, the possibility of applying names, logos or special markings to the tools.

Despite this personalized touch on the products, the soul of each tool remains anchored in the precision and care of the craftsmen. Every touch, every cut and every nuance is applied by skilled hands to the highest quality in order to meet the standards of the Krumpholz brand.

This innovative approach allows us to preserve the tradition of craftsmanship while meeting the demands of modern times. Every tool that leaves our production facility is therefore not only a result of state-of-the-art

technology, but also a testament to the attention to detail and heritage of traditional craftsmanship.

**Every movement, every cut  
and every nuance is  
Krumpholz is implemented by  
skilled hands to the highest  
quality.**

Through this combination of tradition, innovation and sustainability, we are constantly striving to shape the future of craftsmanship and create high-quality tools that are renowned for their quality, durability and environmental friendliness.

# Sustainable production in the heart of Upper Franconia

As a company and employer, we take our social and environmental responsibility very seriously. Central to this is our production powered by the force of water. For generations, the Guttenberger Hammer has operated using the hydraulic power of a reservoir fed by a stream.

In the picturesque region of Upper Franconia, surrounded by lush green forests and clear rivers, lies the venerable forge of Krumpholz Tools. For 225 years, this family-owned company has stood for excellent craftsmanship, and in recent years, it has also emerged as a pioneer in sustainable production.

The decision to keep production local is a central tenet of Krumpholz Tools' sustainable philosophy. Here, it's not

just about crafting tools but also about creating jobs and bolstering the local economy. This commitment to the region goes hand in hand with dedication to environmental protection and sustainable production practices.

One of the most impressive measures to reduce carbon dioxide emissions involves the implementation of new forging furnaces. These modern furnaces are not only more efficient but also environmentally friendly. By utilizing new

A tradition of quality since 1799.

technologies, energy consumption has been significantly reduced, not only saving costs but also making a positive contribution to environmental protection.

Another step towards environmental compatibility is the power supply of the production facility through hydroelectric power. The region's clear waters are used to generate clean, renewable energy. This not only minimizes the ecological footprint but also ensures independence from fossil fuels.

## Without plastic - without toxic substances

In an effort to avoid plastic waste, Krumpholz Tools consistently opts for tools without plastic. Both packaging and the tools themselves are designed to largely eliminate the use of plastic. This environmentally friendly approach spans the entire product lifecycle, from production to disposal. Another milestone in sustainable production is the consistent avoidance of toxic substances.

This not only protects the environment but also the health of those working with the tools. However, Krumpholz Tools' philosophy goes beyond merely avoiding environmental impacts. The products are crafted with a focus on durability and quality.

Each tool is not only functional but also designed to last for decades. This means less waste and a more sustainable use of resources.

## Standards for a sustainable future

The sustainable production at Krumpholz Tools stands as an inspiring example of merging tradition with en-

# -1.150 tons of CO<sub>2</sub> per year

By acquiring four new ovens, we achieve a reduction of approximately 1,150 tons of CO<sub>2</sub> per year.

vironmental consciousness. The company proves that it's possible to combine craftsmanship excellence with a deep respect for nature. This path may be demanding, yet it contributes to shaping a world where high-quality tools are valued not just for their functionality but also for their positive impact on the environment. Krumpholz Tools sets standards for a sustainable future in craftsmanship.

By consistently choosing to manufacture tools without plastic and avoiding toxic substances, the company not only sets benchmarks in the quality of its products but also in its effort to minimize environmental impact.

This comprehensive sustainability strategy demonstrates that tradition and innovation can work hand in hand to forge a better future—tool by tool, generation by generation.

# A brand of the century

After 2016 and 2019, the consistently high-quality brand management of the family-owned company Krumpholz Werkzeuge from Grafengehaig was recognized with confirmation as a German „Brand of the Century“.

A “Brand of the Century” can only be named if it is listed as such in the German standards. Six years ago, the Upper Franconian forge Krumpholz Werkzeuge was included in the prestigious circle of German lighthouse brands. From Abtei for natural medicine to Krumpholz for forged gardening, forestry and construction tools to Zwiesel for crys-

tal glass, every company listed in the German Standards as a “Brand of the Century” is an exemplary leader in its product category.

Achieving the status of “Brand of the Century” is one thing. Maintaining it is quite another. Every three years, the actu-

al brand performance of companies listed in the German Standards is put to the test to ensure that brand management remains constant and at an exemplary level.

The Krumpholz Werkzeuge company and brand have now passed this re-test, so to speak, and have been confirmed as a German “Brand of the Century” for a further three years.

“‘Brands of the Century’ is an encyclopedia of great German brands. It presents the icons of the German economy,” said laudator Dr. Florian Langenscheidt at the pres-

entation of the certificate to the entrepreneurial couple Claus and Elke Krumpholz at the Hotel Adlon in Berlin on February 10. “The book shows who has set standards in their field,” continued Dr. Langenscheidt. The publication “German Standards - Brands of the Century 2019” lists the more than 200 most popular German brands and is published by Tempus Corporate, a wholly-owned subsidiary of the Hamburg-based ZEIT publishing house.

## Award: From the best family

**Krumpholz-Werkzeuge is the only company in the green sector to be included in the classic book „Aus bester Familie“, which portrays 100 outstanding German family businesses.**

Now in its eighth generation, the forge in Grafengehaig, founded in 1799, produces high-quality garden and forestry tools for the German and European market, among other things. “We are delighted to be included in the network of the best,” says junior boss Claus Krumpholz. It brings together major global market leaders as well as smaller

medium-sized companies. Together, they reflect the powerful diversity of the German corporate landscape. The high-quality publication “Aus bester Familie” and the associated network are a project of the “Deutsche Standards” media brand, which the ZEIT publishing group has been publishing since the start of its SME initiative in 2018. In

addition to “Aus bester Familie”, the “Brands of the Century” and the “Lexicon of German Family Businesses” are among the well-known projects of “Deutsche Standards”. Krumpholz has also been repeatedly included in the “Brands of the Century” group.

For over twenty years, “Deutsche Standards” has made it its mission to provide the premier league of German brands with a permanent platform for valuable, shared visibility.

To this end, the top-class media brand offers companies a modular system of diverse formats in the form of print

products, podcasts, videos and events. These are all reserved for outstanding German brands - with family businesses as the “heart of German entrepreneurship”, according to “Deutsche Standards”. Professor Dr. Peter May, leading international expert in the field of family businesses and co-editor of the publication “From the Best Family”, said at its launch in Berlin in December: “In turbulent times, it is more important than ever to draw attention to the achievements of German family businesses. They stand for continuity, sustainability, economic success and social responsibility - and are therefore stabilizers of a Europe characterized by peace, freedom and prosperity.”

## Manufacturer of the best garden tools

**Great jubilation at the traditional Krumpholz company: company boss Claus Krumpholz was presented with the TASPO Award 2018 „Best Manufacturer“ in the German garden center and nursery industry in Berlin.**

The coveted TASPO Award is regarded as the “Oscar” and highest award of its kind in the gardening industry. Every year, this important industry prize is awarded in several categories by specialist publisher Haymarket Medien. The traditional forge Krumpholz has now won the coveted TASPO Award 2018 in the “Best Manufacturer” category - the first

company in the tool industry ever to do so. “Amazing,” said Claus and Elke Krumpholz as they were presented with the trophy in front of around 450 invited industry guests at a gala on Friday evening at the Grand Hyatt Hotel on Potsdamerplatz in Berlin. The jury gave two reasons for choosing Grafengehaiger as the winner: firstly, Krumpholz has been

providing a high-quality counterpoint to cheap Asian imports in the green sector for years with the quality of its tools. This helps the specialist retail trade to set itself apart from low-cost suppliers and discounters with Krumpholz tools.

On the other hand, Krumpholz enriches the hobby of millions of German gardening enthusiasts: with more than 500 tool articles, the Krumpholz range is more versatile than that of almost any other German supplier. Whether classics such as the sow’s tooth, dandelion pruner, side spade and the like, or practical new developments such as the garden disk and spork - Krumpholz stands for both classic and ultra-modern

garden tools. “Each one of them is actually truly unique,” emphasizes Claus Krumpholz, “because we forge and shank them by hand.” In the garden center industry, the following now applies with regard to the quality and perceived value of forged Krumpholz garden tools: “You don’t buy them - you invest in them. Because they last a gardener’s lifetime.”

Krumpholz Werkzeuge has recently received a number of important business awards, including German Brand Awards, a sustainability award and the inclusion of the Krumpholz Werkzeuge brand in the ranks of the “German Brands of the Century”.

## Two major brand awards

The German Brand Institute has now honored Krumpholz-Werkzeuge twice with the German Brand Award 2018.

During a ceremony at the German Historical Museum in Berlin, the Upper Franconian forge received this award in the "Gardening & Tools" category and also in the "Sustainable Brand of the Year" category.

The significance of the brand is unbroken, and with the increasing digitalization of retail, its importance is only increasing.

The "German Brand Monitor 2017/2018" shows that 73% of the brand experts surveyed expect strategic brand management to become even more important in the future.

For more than 90 percent of decision-makers in the market, brand and consistent brand management are considered to be essential factors for corporate success and the key to achieving important corporate goals.

The German Brand Award is the annual award for the most successful brand management in Germany. The award is initiated by Germany's design and brand author-

ity, the German Brand Institute Foundation, Frankfurt am Main, with its more than 300 member companies. One of the foundation's sponsors is the German Design Council of 1953, one of the world's leading competence centers for communication and knowledge transfer in the field of design.

Over 1,250 entries were submitted to this year's German Brand Award competition. 51 percent of these were in the "Industry Excellence in Branding" category, 49 percent in the "Excellence in Brand Strategy, Management and Creation" category.

In the categories "Industry Excellence in Branding" and "Excellence in Brand Strategy, Management and Creation", up to ten of the best brand strategies are recognized as "Winners".

Krumpholz Werkzeuge was the only company in the green sector to position itself in the German Brand Award 2018 - and in two important categories at that.

## Confirmed as a major German brand

The Upper Franconian family business Krumpholz Werkzeuge was not only honored with the „German Brand Award“ - but also confirmed in the list of „Great German Brands“.

The German Brand Award was initiated by the German Design Council, which was founded in 1953 by the German Bundestag and sponsored by the Federation of German Industries.

Owner Claus Krumpholz is delighted with the outstanding German Brand Award and sees this as confirmation of his strict brand management over many years: „For us, this is proof that clear brand competence offers added value and is worth more in the garden center sector.

Lowest price strategies and Asian import mania are neither sustainable nor forward-looking strategies for the true specialist trade. Cheap mania means cheapest quality - but that's not the way to treat your customers as a responsible specialist retailer.“

In order for a brand to receive a „German Brand Award“, it has to overcome several hurdles. First of all, it cannot apply on its own initiative, but must be nominated by the German Brand Institute, its brand scouts or by expert committees. A high-caliber jury from industry and science then

examines the actual prize-worthiness of a candidate in the course of the recognition process.

The test criteria include, among other things, the brand's distinctiveness, its differentiation from the competition, its originality and design quality, but also the longevity of the brand products, their relevance to the target group and the economic success of the company. „We were able to convince and score points in all test categories,“ says Claus Krumpholz, who has been pursuing a clear differentiation strategy against low-cost suppliers for years.

## Sponsoring: Jacob Schramm

Krumpholz-Werkzeuge continues to support Jacob Schramm as a helmet sponsor on his way to the top of German skiing.

We are proud to announce that we are continuing to support Jacob Schramm as a helmet sponsor in German skiing. This up-and-coming young talent is no stranger to us.

Jacob Schramm comes from our own community of Grafengehaig. We still remember him making his first attempts on skis just a few meters away from our smithy.

The connection between Jacob and our community is something very special for us. It fills us with joy to see how his talent and passion for skiing has developed. The combination of quality in craftsmanship and quality in top-class sport, both originating from the picturesque Franconian Forest, is something special for us. It fills us with pride to be able to accompany someone from our

own community on his path in skiing. Jacob Schramm stands for commitment, talent and the determination to always improve - values that we also uphold in our craftsmanship.

We invite you to follow Jacob on his social media channels, Facebook and Instagram, to stay up to date and

take a look behind the scenes of his training and competition. Through these channels, we will continue to report regularly on his successes and developments, as we are proud to be part of his athletic journey.

Jacob, we wish you all the best for the upcoming season! May it be filled with success, passion and luck!

## Sponsoring: Bamberg Baskets

**Krumpholz-Werkzeuge recently announced a partnership with the Bamberg Baskets, a leading team in the German Basketball Bundesliga.**

The connection between Krumpholz-Werkzeuge and the Bamberg team is more than just a sponsorship agreement.

It combines the heritage of precision and quality of blacksmithing with the dedication, power and dynamism of basketball. The blacksmith, which has been produc-

ing high-quality tools for 225 years, brings a deep commitment to craftsmanship to this partnership. Its tools, forged by hand and cherished by generations, embody precision, durability and quality - values that are also crucial in top-level sports such as basketball.

The decision to support the Bamberg Baskets reflects

the forge's commitment to excellence. The similarities between precision in craftsmanship and precision on the basketball court are unmistakable. Both require technique, perseverance and a quest for perfection.

Through this sponsorship, Schmiede will not only become a partner of the team, but also a part of Bamberg's basketball culture. The blacksmith will present its products at the games and communicate the value of tradition and craftsmanship to a wide audience.

The Bamberg Baskets, a team with a long history of success, will now perform with the support of the forge from

the Franconian Forest. This partnership shows how the tradition and values of a region can be combined with modern sport.

The blacksmith from the Franconian Forest is looking forward to accompanying the Bamberg team on their journey and reflecting their values of quality, precision and dedication on the pitch.

This collaboration symbolizes the union of two worlds - that of craftsmanship and that of sport - and will undoubtedly bring joy to both basketball fans and supporters of the blacksmith.

# Freedom cannot perish as long as blacksmiths hammer iron.

Ernst Moritz Arndt

In our forge, crafted work gives rise to tools that aren't merely bought; they're acquired. Invested in. Because they accompany the seasonal life of gardens for decades, passed down to the next generation of gardeners.

# Light, sharp & handy

The classic gardening axe is ideal for pruning and making kindling. The hand-forged hatchet edge made of high-quality steel, paired with a premium ash or hickory handle, ensures stability and a long lifespan. The garden hatchet can be delivered with a leather blade guard and a matching belt buckle.

**Illustration: item no.: 0332**

A tradition of quality since 1799.

## Gardening hatchets & axes

Sowtooth, forged

Item no.	Weight	Length*	Handle
1061	1.200 g	150 cm	Handle (Ash)

Valuable  
for the floor

The sowtooth is an important garden tool for tilling the soil. It consists of a sickle-shaped tine, the tip of which is forged into a lance. As it is only used to loosen the uppermost part of the soil (approx. 10 cm), it does not disturb the natural layers, which is why it is often used for organic gardening.

1594	1.300 g	85 cm	D-Shaft (Ash)

The test winner  
among the spades

"The spade goes into the ground like butter and stands there like a charm. It has the sharpest edge of all and stays sharp thanks to its special grind. I wouldn't use it to dig up a large bed because of the small blade size. But it's unbeatable for working between perennials and for digging precise planting pits. Here you can see real workmanship: the blade is forged by hand from a single piece, including the treading edge; the handle and grip are carved from a single piece and untreated. The women's spade is perfect for me, men would need a larger model. "Elke" is my absolute favorite in the test. It's expensive, but it's worth it."

Fig. item no.: 1589

PROFESSIONAL  
2023**

www.worldgardenawards.com

**Krumpholz  
Pointed spade,  
Artikel Nr. 1770**

Category:  
Hand tools

**Quality + function**

The pointed spade with step, item no. 1770 from Krumpholz, wins the WORLD GARDEN AWARD in the hand tools category of the „Professional“ class.

The WORLD GARDEN AWARD is given to the spade with step, item no. 1770, because it particularly impressed the jury in terms of quality and function.

[www.krumpholz1799.de](http://www.krumpholz1799.de)

The WORLD GARDEN AWARDS are presented annually. With the awards, the expert jury honors products that stand out from the competition with new ideas or technologies, precise and durable workmanship and the use of high-quality materials or an excellent relation between acquisition costs and utility value.

Gardening tools

Landscaping tools

Forestry tools

Spades

\*Length of the handle

Gardener's spade

Item no.	Weight	Length*	Handle
1377	2.100 g	90 cm	T-Shaft (Ash)
1407	2.000 g	100 cm	Button-Shaft (Ash)
1593	2.200 g	90 cm	D-Shaft (Ash)

Ladies' spade

Item no.	Weight	Length*	Handle
1376	1.600 g	85 cm	T-Shaft (Ash)
1406	1.500 g	95 cm	Button-Shaft (Ash)
1591	1.700 g	85 cm	D-Shaft (Ash)

Clearing spade

Item no.	Weight	Length*	Handle
1378	2.800 g	90 cm	T-Shaft (Ash)
1408	2.700 g	100 cm	Button-Shaft (Ash)
1592	3.000 g	90 cm	D-Shaft (Ash)

Drain spade

Item no.	Weight	Length*	Handle
6701	2.200 g	90 cm	T-Shaft (Ash)
6702	2.000 g	100 cm	Button-Shaft (Ash)

Steel pipe spade

\*Length of the handle

Pointed spade (from one piece of steel) „English form“ with step

Item no.	Weight	Length*	Handle
1790	2.850 g	90 cm	Steel tube T-Shaft & wooden handle
1791	2.850 g	90 cm	Steel tube D-Handle Shaft
1796	2.850 g	90 cm	Steel tube-Button-Shaft & wood knob

Gardener's spade (from one piece of steel) „English form“ with step

Item no.	Weight	Length*	Handle
1792	2.850 g	90 cm	Steel tube T-Shaft & wooden handle
1793	2.850 g	90 cm	Steel tube D-Handle Shaft
1797	2.850 g	90 cm	Steel tube-Button-Shaft & wood knob

SHARK-spade (from one piece of steel) „English form“ with step

Item no.	Weight	Length*	Handle
1794	2.850 g	90 cm	Steel tube T-Shaft & wooden handle
1795	2.850 g	90 cm	Steel tube D-Handle Shaft
1798	2.850 g	90 cm	Steel tube-Button-Shaft & wood knob

SHARK Hollow and planting spade (wide T-crutch)

Item no.	Weight	Length*	Handle
5895	2.400 g	80 cm	Steel tube T-Shaft

Hollow and planting spade (wide T-crutch)

Item no.	Weight	Length*	Handle
5891	1.450 g	80 cm	Steel tube T-Shaft
5892	1.450 g	80 cm	Steel tube T-Shaft
5893	1.450 g	80 cm	Steel tube T-Shaft

SPORK Hollow and planting spade (wide T-crutch)

Item no.	Weight	Length*	Handle
5894	2.100 g	80 cm	Steel tube T-Shaft

## Shrub divider, forged in one piece

\*Length of the handle

Shrub divider

Item no.	Weight	Length*	Handle
1545	1.200 g	85 cm	T-Shaft (Ash)

## Edging knife, forged in one piece

Edging knife  
with step

Item no.	Weight	Length*	Handle
1546	1.400 g	85 cm	T-Shaft (Ash)

## Weeders

Weed cutter  
with step

Item no.	Weight	Length*	Handle
1541	1.200 g	85 cm	T-Shaft (Ash)

Dock cutter

Item no.	Weight	Length*	Handle
1083	1.000 g	90 cm	T-Shaft (Ash)

# Simple & clean edges

Einfach  
saubere Kanten

The edging knife is ideal for clearly separating beds or paths from a lawn area. The special shape of the blade allows the blade to be moved further, without losing the connection.

Fig. item no.: 1546

# The SPORK - our all-rounder

The unique principle of the SPORK combines a variety of gardening tools in one. The SPORK can be used to dig and loosen hard, heavy soil. In addition to digging its advantages also include cutting through roots, removing weeds, loosening soil, planting work, aerating lawns and even cutting off lawn edges.

Fig. item no.: 1381

A tradition of quality since 1799.

## SPORK

\*Length of the handle

### Gardener's SPORK

Item no.	Weight	Length*	Handle
1381	1.500 g	90 cm	T-Shaft (Ash)

### Ladies' SPORK

Item no.	Weight	Length*	Handle
1382	1.100 g	80 cm	T-Shaft (Ash)

### Grandma's SPORK

Item no.	Weight	Length*	Handle
1387	1.000 g	45 cm	T-Shaft (Ash)

### Hand SPORK

Item no.	Weight	Length*	Handle
1385	220 g	14 cm	Handle (Ash)
1386	450 g	48 cm	Button-Shaft (Ash)

### SPORK hoe

Item no.	Weight	Length*	Handle
1388	300 g	14 cm	Handle (Ash)
1383	1.250 g	140 cm	Shaft (Ash)

### SPORK path weeder

Item no.	Weight	Length*	Handle
1384	1.220 g	140 cm	Shaft (Ash)

Rose forks and weeding forks

\*Length of the handle

Rose fork

Item no.	Weight	Length*	Handle
1081	1.250 g	90 cm	T-Shaft (Ash)

Hand spades, forged

Shrub spade

Item no.	Weight	Length*	Handle
1328	420 g	45 cm	T-Shaft (Ash)

Hand spade

Item no.	Weight	Length*	Handle
1370	460 g	45 cm	T-Shaft (Ash)
1337	720 g	80 cm	T-Shaft (Ash)

Camping spade

Item no.	Weight	Length*	Handle
1751	800 g	45 cm	T-Shaft (Ash)
1752	750 g	45 cm	Button-Shaft (Ash)
1753	850 g	80 cm	T-Shaft (Ash)

Scouts' spade

Item no.	Weight	Length*	Handle
1754	800 g	45 cm	T-Shaft (Ash)
1755	750 g	45 cm	Button-Shaft (Ash)
1756	850 g	80 cm	T-Shaft (Ash)

Perfect for the  
most beautiful roses

The special shape of the tines pushes the rose roots aside and makes it easy to reach the roots without damaging them. These properties allow you to work more precisely with a rose fork and you really only loosen the soil without damaging the roots.

Fig. item no.: 1081

# Power-saving and efficient

The spading fork enables effortless loosening and aeration of rooted soil as well as rapid excavation and digging of very moist, heavy soil. The screws in the sturdy spring socket of the spading fork can be easily retightened if necessary.

Fig. item no.: 0411

A tradition of quality since 1799.

## Forks

\*Length of the handle

### Spading fork with bayonet prongs

Item no.	Weight	Length*	Handle
0411	1.600 g	80 cm	T-Shaft (Ash)
0413	1.800 g	75 cm	D-Shaft (Ash)

### Spading fork with lancet prongs

Item no.	Weight	Length*	Handle
0414	1.600 g	80 cm	T-Shaft (Ash)
0415	1.800 g	75 cm	D-Shaft (Ash)

### Ladies' fork with rail clamp (0420)

Item no.	Weight	Length*	Handle
0418	1.220 g	80 cm	T-Shaft (Ash)
0419	1.320 g	90 cm	Button-Shaft (Ash)
0420	1.200 g	80 cm	T-Shaft (Ash)

### Hay fork with 3 prongs item no. 9984, with 4 prongs item no. 9985

Item no.	Weight	Length*	Handle
9984	1.550 g	130 cm	Shaft (Ash)
9985	1.550 g	130 cm	Shaft (Ash)

### Dung fork

Item no.	Weight	Length*	Handle
1021	1.550 g	95 cm	T-Shaft (Ash)
1022	1.400 g	135 cm	Shaft (Ash)

### Garten keel with 4 prongs

Item no.	Weight	Length*	Handle
1011	400 g	80 cm	Shaft (Ash)
1012	450 g	130 cm	Shaft (Ash)

### Broad fork with step

Item no.	Weight	Length*	Handle
1397	3.500 g	80 cm	Shaft (Ash)

A close-up photograph of a person's hands using a garden fork to loosen soil in a garden bed. The garden fork has a wooden handle and a metal head with three tines. The person is wearing dark clothing and sandals. The garden bed is filled with green grass and various flowers, including yellow daisies and purple thistles. The background is slightly blurred, showing more of the garden.

# The particular is eternally subject to the general, the general must eternally to the particular.

J. W. von Goethe

For ideal growth, the soil must not be coarse, firm or crusty. You should therefore loosen your soil regularly. Because the loosened layers of soil can absorb heat, air, water and nutrients more easily.

You can find tips for a better floor on our website at:  
[www.krumpholz1799.de/gartentipps](http://www.krumpholz1799.de/gartentipps)

Hand hoes, steel, in one piece

\*Length of the handle

Cordate hand hoe

Item no.	Weight	Length*	Handle
1521	1.350 g	48 cm	Cow foot (Ash)
1532	1.350 g	35 cm	Hickory-Kuhfußstiel

Hand hoe "Harz" style

Item no.	Weight	Length*	Handle
1522	1.100 g	48 cm	Cow foot (Ash)

Planting hand hoe

Item no.	Weight	Length*	Handle
1523	1.050 g	48 cm	Cow foot (Ash)
1533	1.350 g	35 cm	Hickory-Kuhfußstiel

Hand hoe "Regensburg" style

Item no.	Weight	Length*	Handle
1524	1.200 g	48 cm	Cow foot (Ash)
1534	1.350 g	35 cm	Hickory-Kuhfußstiel

Hand hoe, oval form

Item no.	Weight	Length*	Handle
1525	1.350 g	48 cm	Cow foot (Ash)
1535	1.350 g	35 cm	Hickory-Kuhfußstiel

Hand hoe, pointed oval form

Item no.	Weight	Length*	Handle
1526	1.200 g	48 cm	Cow foot (Ash)
1536	1.350 g	35 cm	Hickory-Kuhfußstiel

Hand hoe, bed form

Item no.	Weight	Length*	Handle
1527	1.350 g	48 cm	Cow foot (Ash)
1537	1.350 g	35 cm	Hickory-Kuhfußstiel

Hand hoes with round eye

\*Length of the handle

Universal hoe (forged) with round eye

Item no.	Weight	Length*	Handle
1131	400 g	40 cm	Shaft (Ash)
1132	700 g	80 cm	Shaft (Ash)
1133	900 g	130 cm	Shaft (Ash)

Small hand hoe

Item no.	Weight	Length*	Handle
1121	540 g	40 cm	Shaft (Ash)
1122	640 g	80 cm	Shaft (Ash)
1123	900 g	130 cm	Shaft (Ash)

Small gardening hoe

Item no.	Weight	Length*	Handle
1203	580 g	40 cm	Shaft (Ash)
1204	750 g	80 cm	Shaft (Ash)
1205	990 g	130 cm	Shaft (Ash)

Small gardening hoe

Item no.	Weight	Length*	Handle
1103	700 g	40 cm	Shaft (Ash)
1104	670 g	80 cm	Shaft (Ash)
1105	860 g	130 cm	Shaft (Ash)

Weeding hoe

Item no.	Weight	Length*	Handle
1171	750 g	40 cm	Shaft (Ash)
1172	890 g	80 cm	Shaft (Ash)
1173	1.100 g	130 cm	Shaft (Ash)

Gardening hoe, heavy

Item no.	Weight	Length*	Handle
1111	650 g	40 cm	Shaft (Ash)
1112	850 g	80 cm	Shaft (Ash)
1113	1.050 g	130 cm	Shaft (Ash)

Finishing work  
in the bed

The hand hoe is ideal for loosening the soil and hoeing away weeds. Due to its size, it can be used to carry out precise precision work even in the tightest of spaces.

Fig. item no.: 1121

# Versatile helper

The garden hoe is a versatile helper for gardening. Its two working sides and two tines can be used to loosen and aerate the soil or weed. The low weight makes it easy to handle.  
**Fig. item no.: 1101**

A tradition of quality since 1799.

## Hand hoes with round eye

\*Length of the handle

### Small hoe, 3 prongs

Item no.	Weight	Length*	Handle
1151	340 g	40 cm	Shaft (Ash)
1152	470 g	80 cm	Shaft (Ash)
1153	740 g	130 cm	Shaft (Ash)

### Small hoe, 5 prongs

Item no.	Weight	Length*	Handle
1154	350 g	40 cm	Shaft (Ash)
1155	520 g	80 cm	Shaft (Ash)
1156	780 g	130 cm	Shaft (Ash)

### Small gardening hoe

Item no.	Weight	Length*	Handle
1101	990 g	130 cm	Shaft (Ash)

### Small gardening hoe

Item no.	Weight	Length*	Handle
1201	990 g	130 cm	Shaft (Ash)

### Chelsea hoe

Item no.	Weight	Length*	Handle
1302	570 g	40 cm	Shaft (Ash)
1303	760 g	80 cm	Shaft (Ash)
1304	980 g	130 cm	Shaft (Ash)

new

### Small hoe (forged), 2 prongs, with round eye

Item no.	Weight	Length*	Handle
1127	250 g	40 cm	Shaft (Ash)
1128	600 g	80 cm	Shaft (Ash)
1129	700 g	130 cm	Shaft (Ash)

Hoes with round eye

\*Length of the handle

Piranha hoe

Item no.	Head wt.	Length*	Handle	Total wt.
1681	1.100 g	130 cm	Shaft (Ash)	2.100 g

Piranha hoe, slim

Item no.	Head wt.	Length*	Handle	Total wt.
1683	1.050 g	130 cm	Shaft (Ash)	2.000 g

Cordate hoe

Item no.	Head wt.	Length*	Handle	Total wt.
1629	900 g	130 cm	Shaft (Ash)	1.900 g

Field hoe

Item no.	Head wt.	Length*	Handle	Total wt.
1625	900 g	130 cm	Shaft (Ash)	1.900 g

Universal hoe

Item no.	Head wt.	Length*	Handle	Total wt.
1134	900 g	130 cm	Shaft (Ash)	1.900 g

Hoes with round eye

\*Length of the handle

“Harz” style hoe

Item no.	Head wt.	Length*	Handle	Total wt.
1627	900 g	130 cm	Shaft (Ash)	1.900 g

Forestry and planting hoe

Item no.	Head wt.	Length*	Handle	Total wt.
1962	700 g	130 cm	Shaft (Ash)	1.700 g

Planting hoe

Item no.	Head wt.	Length*	Handle	Total wt.
1951	1.100 g	130 cm	Shaft (Ash)	2.000 g

Potato hoe  
2 prongs (1642) | 3 prongs (1646)

Item no.	Head wt.	Length*	Handle	Total wt.
1642	1.000 g	130 cm	Shaft (Ash)	1.900 g
1646	1.200 g	130 cm	Shaft (Ash)	2.100 g

Half-moon hoe

Item no.	Head wt.	Length*	Handle	Total wt.
1632	1.000 g	130 cm	Shaft (Ash)	1.900 g

Field hoe

Item no.	Head wt.	Length*	Handle	Total wt.
1622	900 g	130 cm	Shaft (Ash)	1.800 g

Gardening hoes

\*Length of the handle

Bed hoe

Item no.	Weight	Length*	Handle
1056	1.280 g	140 cm	Shaft (Ash)

Beet hoe

Item no.	Weight	Length*	Handle
1051	1.200 g	140 cm	Shaft (Ash)

Dutch hoe

Item no.	Weight	Length*	Handle
1054	1.000 g	140 cm	Shaft (Ash)

Cordate hoe

Item no.	Weight	Length*	Handle
1301	1.500 g	130 cm	Shaft (Ash)

Gardening hoe

Item no.	Weight	Length*	Handle
1201	1.000 g	130 cm	Shaft (Ash)

Gardening hoe

Item no.	Weight	Length*	Handle
1101	1.000 g	130 cm	Shaft (Ash)

Gardening hoe, heavy

Item no.	Weight	Length*	Handle
1111	650 g	40 cm	Shaft (Ash)

Hoopoe hoe

angular

Item no.	Head wt.	Length*	Handle	Total wt.
1904	1.900 g	110 cm	Shaft (Ash)	2.400 g

Hoopoe hoe

oval

Item no.	Head wt.	Length*	Handle	Total wt.
1902	1.900 g	110 cm	Shaft (Ash)	2.400 g

Pathway building hoe

Item no.	Head wt.	Length*	Handle	Total wt.
1702	1.900 g	110 cm	Shaft (Ash)	2.400 g

Field hoe

Item no.	Head wt.	Length*	Handle	Total wt.
0903	750 g	130 cm	Shaft (Ash)	1.500 g
0904	850 g	130 cm	Shaft (Ash)	1.750 g

Slope hoe

Item no.	Head wt.	Length*	Handle	Total wt.
1503	1.250 g	130 cm	Shaft (Ash)	2.500 g
1504	1.500 g	130 cm	Shaft (Ash)	2.750 g

Flat hoe

Item no.	Head wt.	Length*	Handle	Total wt.
1603	1.250 g	130 cm	Shaft (Ash)	2.300 g
1604	1.500 g	130 cm	Shaft (Ash)	2.550 g

# Everyone is the forge his own luck

German proverb

Weeds are the enemy of all gardeners - because they take away important nutrients and water from your plants. You should therefore protect your plants from unloved weeds by weeding regularly. With most weeds, simply pulling or tearing them out doesn't help much - they have to be pulled out or cut out with the whole root, otherwise you won't be able to keep up with the weeding because they will keep sprouting again and again.

You can find tips on removing weeds on our website at:  
[www.krumpholz1799.de/gartentipps](http://www.krumpholz1799.de/gartentipps)

Weed cutter

\*Length of the handle

Weed cutter Ø 8 mm

Item no.	Weight	Length*	Handle
1455	180 g	14 cm	Handle (Ash)
1457	340 g	48 cm	Button-Shaft (Ash)

Weed cutter Ø 10 mm

Item no.	Weight	Length*	Handle
1456	160 g	14 cm	Handle (Ash)
1458	340 g	48 cm	Button-Shaft (Ash)

Weed cutter

Item no.	Weight	Length*	Handle
1390	180 g	14 cm	Handle (Ash)
1437	340 g	48 cm	Button-Shaft (Ash)

Weed cutter “Bern” style

Item no.	Weight	Length*	Handle
1720	320 g	14 cm	Handle (Ash)
1721	500 g	48 cm	Button-Shaft (Ash)

Weeder and asparagus knife

Item no.	Weight	Length*	Handle
1360	250 g	14 cm	Handle (Ash)

Weeder  
with step (item no.: 1366)

Item no.	Weight	Length*	Handle
1361	430 g	48 cm	Button-Shaft (Ash)
1366	490 g	45 cm	T-Shaft (Ash)

Gardening tools

Landscaping tools

Forestry tools

Crack weeders

\*Length of the handle

Crack knife

Item no.	Weight	Length*	Handle
1332	120 g	14 cm	Handle (Ash)
1340	310 g	75 cm	Shaft (Ash)
1352	380 g	140 cm	Shaft (Ash)
1414	300 g	48 cm	Button-Shaft (Ash)

Crack scraper

Item no.	Weight	Length*	Handle
1318	150 g	14 cm	Handle (Ash)
1319	360 g	75 cm	Shaft (Ash)
1323	480 g	140 cm	Shaft (Ash)
1468	330 g	48 cm	Button-Shaft (Ash)

Triangular crack scraper

Item no.	Weight	Length*	Handle
1353	130 g	14 cm	Handle (Ash)
1354	340 g	75 cm	Shaft (Ash)
1355	460 g	140 cm	Shaft (Ash)
1494	310 g	48 cm	Button-Shaft (Ash)

new

Weeding hoe

Item no.	Weight	Length*	Handle
1498	250 g	14 cm	Handle (Ash)

For the  
narrowest  
places

The crack knife penetrates deep into the ground in the tightest of spaces and is therefore ideal for removing moss or weeds from paths and between paving stones.

Fig. item no.: 1332

Gardening disks

\*Length of the handle

Gardening disk

Item no.	Weight	Length*	Handle
1326	180 g	14 cm	Handle (Ash)
1324	480 g	75 cm	Shaft (Ash)
1325	540 g	140 cm	Shaft (Ash)

Gardening disk, large

Item no.	Weight	Length*	Handle
1091	180 g	170 cm	P-Shaft (Ash)

Gardening disk, half-round

Item no.	Weight	Length*	Handle
1092	180 g	170 cm	P-Shaft (Ash)

Sickles and scythes

Sickle  
for left-handers (0655)

Item no.	Weight	Length*	Handle
0651	300 g	14 cm	Handle (Ash)
0652	400 g	14 cm	Handle (Ash)
0655	300 g	14 cm	Handle (Ash)

Scythe-shaped sickle

Item no.	Weight	Length*	Handle
0661	500 g	14 cm	Handle (Ash)

360° cuts

Weed removal in all directions has never been easier. The circular blade cuts unwanted plants effortlessly in all directions. Particularly well suitable in closely planted beds.

Fig. item no.: 1326

# Removing weeds made easy

Instead of trying to cut out the dandelion with a small shovel or similar gardening tool, simply screw the dandelion puller into the ground and then pull it out. The plant and its roots are then removed - a very simple principle similar to a corkscrew. Thanks to its extended handle, the garden tool is also extremely easy on the back, as it saves you having to constantly bend down to cut out and pick up the plant.

Fig. item no.: 1311

A tradition of quality since 1799.

## Cape Cod Weeder

\*Length of the handle

### Cape Cod Weeder, right-handed

Item no.	Weight	Length*	Handle
1342	200 g	14 cm	Handle (Ash)
1404	300 g	140 cm	Shaft (Ash)
1445	250 g	28 cm	P-Shaft (Ash)

### Cape Cod Weeder, left-handed

Item no.	Weight	Length*	Handle
1343	200 g	14 cm	Handle (Ash)
1446	250 g	28 cm	P-Shaft (Ash)

## Dandelion screw

### Dandelion screw

Item no.	Weight	Length*	Handle
1311	340 g	40 cm	T-Shaft (Ash)
1312	540 g	80 cm	T-Shaft (Ash)

## Garden sickle

### Garden sickle

Item no.	Weight	Length*	Handle
0631	1.000 g	40 cm	Button-Shaft (Ash)

Bonsai tools

\*Length of the handle

Bonsai planting fork

Item no.	Weight	Length*	Handle
1415	40 g	10 cm	Handle (Ash)

Bonsai planting fork small

Item no.	Weight	Length*	Handle
1416	30 g	10 cm	Handle (Ash)

Bonsai planting trowel

Item no.	Weight	Length*	Handle
1417	40 g	10 cm	Handle (Ash)

Bonsai knife

Item no.	Weight	Length*	Handle
1418	30 g	10 cm	Handle (Ash)

Bonsai grubber

Item no.	Weight	Length*	Handle
1419	40 g	10 cm	Handle (Ash)

Junior tools

\*Length of the handle

Junior spade

Item no.	Weight	Length*	Handle
1473	700 g	75 cm	T-Shaft (Ash)

Junior pointed spade

Item no.	Weight	Length*	Handle
1472	700 g	75 cm	T-Shaft (Ash)

Junior shovel

Item no.	Weight	Length*	Handle
1474	700 g	75 cm	T-Shaft (Ash)

Junior path weeder

Item no.	Weight	Length*	Handle
1475	400 g	75 cm	Shaft (Ash)

Junior trowel

Item no.	Weight	Length*	Handle
1470	160 g	10 cm	Handle (Ash)

Junior hand fork

Item no.	Weight	Length*	Handle
1471	140 g	10 cm	Handle (Ash)

Junior gardening rake

Item no.	Weight	Length*	Handle
1478	400 g	75 cm	Shaft (Ash)

For the little ones  
the biggest

Working in the garden is also a great experience for the little ones. So that the „junior gardeners“ can get involved with the right tools, we have developed special junior tools for children.

Fig. item no.: 1470

Shovels

\*Length of the handle

Shovel "Holstein"

Item no.	Weight	Length*	Handle
5151	1.900 g	130 cm	Shaft (Ash)
5152	1.800 g	95 cm	T-Shaft (Ash)

Shovel "Frankfurt"

Item no.	Weight	Length*	Handle
5051	2.000 g	130 cm	Shaft (Ash)

Shovel "Holland"

Item no.	Weight	Length*	Handle
6451	1.950 g	130 cm	Shaft (Ash)
6452	1.850 g	95 cm	T-Shaft (Ash)

Shovel "Emsland"

Item no.	Weight	Length*	Handle
6461	1.700 g	130 cm	Shaft (Ash)

Shovel, forged

Item no.	Weight	Length*	Handle
1368	2.500 g	130 cm	Shaft (Ash)

Ladies' shovel

Item no.	Weight	Length*	Handle
1581	2.000 g	130 cm	Shaft (Ash)
1582	1.900 g	95 cm	T-Shaft (Ash)

"SPovel"

Item no.	Weight	Length*	Handle
5153	1.300 g	105 cm	T-Shaft (Ash)

Aluminium shovels

\*Length of the handle

Aluminium shovel

Size 7 (6208), Size 9 (6209)

Item no.	Weight	Length*	Handle
6208	1.700 g	130 cm	Shaft (Ash)
6209	2.000 g	130 cm	Shaft (Ash)

Aluminium fruit shovel

Item no.	Weight	Length*	Handle
7621	1.800 g	130 cm	Shaft (Ash)
7622	1.700 g	95 cm	T-Shaft (Ash)

Shovel, American style

Spade shovel, in one piece

Item no.	Weight	Length*	Handle
1691	1.800 g	130 cm	Button-Shaft (Ash)
1692	1.700 g	80 cm	T-Shaft (Ash)
1693	1.900 g	75 cm	D-Shaft (Ash)

Lawn aerator

Lawn aerator

Item no.	Weight	Length*	Handle
1351	1.300 g	80 cm	T-Shaft (Ash)

Path weeders

\*Length of the handle

Cordate path weeder

Item no.	Weight	Length*	Handle
1052	1.210 g	170 cm	Shaft (Ash)

Half-moon path weeder

Item no.	Weight	Length*	Handle
1053	1.230 g	170 cm	Shaft (Ash)

Rectangular path weeder

Item no.	Weight	Length*	Handle
1055	1.200 g	170 cm	Shaft (Ash)

Hand plow

Hand plow (610x70x105 mm)

Item no.	Weight	Length*	Handle
9802	350 g	48 cm	Button-Shaft (Ash)

Hand plow (large)

Item no.	Weight	Length*	Handle
9803	1.000 g	140 cm	Shaft (Ash)

Rakes

\*Length of the handle

Leaf rake

26 prongs

Item no.	Weight	Length*	Handle
1460	1.050 g	150 cm	Shaft (Ash)

Lawn rake

20 prongs

Item no.	Weight	Length*	Handle
1345	1.100 g	150 cm	Shaft (Ash)

Rake, steel, forged in one piece

14 prongs (4836) | 16 prongs (4837)

Item no.	Weight	Length*	Handle
4836	1.500 g	150 cm	Shaft (Ash)
4837	1.800 g	150 cm	Shaft (Ash)

Street rake

heavy 14 prongs (4881) | light 14 prongs (4981)

Item no.	Weight	Length*	Handle
4881	2.050 g	150 cm	Shaft (Ash)
4981	1.150 g	150 cm	Shaft (Ash)

Bow rake

Item no.	Weight	Length*	Handle
1428	1.800 g	150 cm	Shaft (Ash)

Weeding and Scarifying rake

Item no.	Weight	Length*	Handle
1429	1.500 g	140 cm	Shaft (Ash)

Scarifying rake

Item no.	Weight	Length*	Handle
1441	1.500 g	140 cm	Shaft (Ash)

# Landscaping tools

Hand-forged quality tools that are ideal for professional use in landscaping tools. Like the garden and forestry tools, these are manufactured with the utmost care to withstand the special requirements.

▶ Shovels, EURO quality	112
▶ Shovel American style	115
▶ Hollow spades	115
▶ Paving hammers	116
▶ Sledge hammers	116
▶ Mallets	117
▶ Stone chopping sledges	117
▶ Cross hammers	117
▶ Nail puller	118
▶ Stripping iron	118
▶ Scaffolding bracket	118
▶ Crowbars	119
▶ Ice pushers	120
▶ Snow shovels	120
▶ Hand Excavator	120
▶ Forks	121

Shovels, EURO quality

\*Length of the handle

Shovel "Holstein" EURO

Item no.	Weight	Length*	Handle
5107	1.900 g	130 cm	Shaft (Ash)

Shovel "Frankfurt" EURO

Item no.	Weight	Length*	Handle
5007	1.900 g	130 cm	Shaft (Ash)

Shovel "Bavaria" EURO

Item no.	Weight	Length*	Handle
5213	2.100 g	130 cm	Shaft (Ash)

Cable trench shovel EURO

Item no.	Weight	Length*	Handle
6502	1.700 g	130 cm	Shaft (Ash)

Oil-hardened according to DIN

The EURO buckets from Krumpholz are made of special bucket plate, oil-hardened and powder-coated or painted clear. The casing is continuously welded - the working edges are ground and calibrated. The handles made of 1a ash wood are ff polished, clear lacquered and have a blue lower handle end.

Shovel American style

\*Length of the handle

Spade shovel, in one piece

Item no.	Weight	Length*	Handle
1691	1.800 g	130 cm	Button-Shaft (Ash)
1692	1.700 g	80 cm	T-Shaft (Ash)
1693	1.900 g	75 cm	D-Shaft (Ash)

Hollow spades

Hollow spade SHARK  
with step (Item no.: 5887)

Item no.	Weight	Length*	Handle
5885	2.420 g	80 cm	T-Shaft (Ash)
5887	2.420 g	80 cm	T-Shaft (Ash)

Hollow spade SPORK

Item no.	Weight	Length*	Handle
5884	2.080 g	80 cm	T-Shaft (Ash)

Hollow planting spade (large)

Item no.	Weight	Length*	Handle
5883	2.860 g	80 cm	T-Shaft (Ash)

Hollow planting spade (medium)  
with step (Item no.: 5888)

Item no.	Weight	Length*	Handle
5882	2.420 g	80 cm	T-Shaft (Ash)
5888	2.420 g	80 cm	T-Shaft (Ash)

Hollow planting spade (small)

Item no.	Weight	Length*	Handle
5881	1.540 g	80 cm	T-Shaft (Ash)

Paving hammers

\*Length of the handle

Walling hammer Berlin style

Item no.	Weight	Length*	Handle
5300	1.000 g	18 cm	Shaft (Ash)
5301	1.500 g	18 cm	Shaft (Ash)
5302	2.000 g	18 cm	Shaft (Ash)
5303	2.500 g	18 cm	Shaft (Ash)

Walling hammer Berlin style „Safety“

Item no.	Weight	Length*	Handle
5351	1.000 g	18 cm	Shaft (Ash)
5352	1.500 g	18 cm	Shaft (Ash)
5353	2.000 g	18 cm	Shaft (Ash)
5354	2.500 g	18 cm	Shaft (Ash)

Sledge hammers

Sledge hammer

Item no.	Head wt.	Length*	Handle	Total wt.
2911	3.000 g	60 cm	Shaft (Ash)	3.400 g
2912	4.000 g	70 cm	Shaft (Ash)	4.500 g
2913	5.000 g	80 cm	Shaft (Ash)	5.800 g
2914	6.000 g	80 cm	Shaft (Ash)	6.800 g
2915	8.000 g	90 cm	Shaft (Ash)	8.900 g
2916	10.000 g	90 cm	Shaft (Ash)	10.900 g

Mallets

\*Length of the handle

Mallet

Item no.	Head wt.	Length*	Handle	Total wt.
2621	3.000 g	60 cm	Shaft (Ash)	3.400 g
2622	4.000 g	70 cm	Shaft (Ash)	4.500 g
2623	5.000 g	80 cm	Shaft (Ash)	5.800 g
2624	6.000 g	80 cm	Shaft (Ash)	6.800 g
2625	8.000 g	90 cm	Shaft (Ash)	8.900 g
2626	10.000 g	90 cm	Shaft (Ash)	10.900 g

Stone chopping sledges

Stone chopping sledge

Item no.	Head wt.	Length*	Handle	Total wt.
2811	3.000 g	60 cm	Shaft (Ash)	3.400 g
2812	4.000 g	70 cm	Shaft (Ash)	4.500 g
2813	5.000 g	80 cm	Shaft (Ash)	5.800 g
2814	6.000 g	80 cm	Shaft (Ash)	6.800 g
2815	8.000 g	90 cm	Shaft (Ash)	8.900 g
2816	10.000 g	90 cm	Shaft (Ash)	10.900 g

Cross hammers

Cross hammer

Item no.	Head wt.	Length*	Handle	Total wt.
2711	3.000 g	60 cm	Shaft (Ash)	3.400 g
2712	4.000 g	70 cm	Shaft (Ash)	4.500 g
2713	5.000 g	80 cm	Shaft (Ash)	5.800 g
2714	6.000 g	80 cm	Shaft (Ash)	6.800 g
2715	8.000 g	90 cm	Shaft (Ash)	8.900 g
2716	10.000 g	90 cm	Shaft (Ash)	10.900 g

Nail puller

Nail puller hexagonal Ø 18 mm

Item no.	Weight	Length	Diameter
3802	1.700 g	60 cm	18 mm
3803	2.100 g	80 cm	18 mm
3804	2.500 g	100 cm	18 mm
3807	3.000 g	120 cm	18 mm

Nail puller round Ø 22 mm

Item no.	Weight	Length	Diameter
3823	1.900 g	60 cm	22 mm
3824	2.500 g	80 cm	22 mm
3825	3.000 g	100 cm	22 mm
3826	3.500 g	120 cm	22 mm

Stripping iron

Stripping iron Ø 22 mm

Item no.	Weight	Length	Diameter
3701	2.450 g	80 cm	22 mm
3702	2.700 g	90 cm	22 mm
3703	3.100 g	100 cm	22 mm
3704	3.600 g	120 cm	22 mm

Stripping iron Ø 25 mm

Item no.	Weight	Length	Diameter
3711	3.200 g	80 cm	25 mm
3712	3.600 g	90 cm	25 mm
3713	4.000 g	100 cm	25 mm
3714	4.800 g	120 cm	25 mm

Scaffolding bracket

Scaffolding bracket

Item no.	Weight	Length	Diameter
3921	400 g	30 cm	14 mm

Crowbars

Crowbar with curved nail claw

Item no.	Weight	Length	Diameter
3112	4.750 g	125 cm	25 mm
3113	8.000 g	150 cm	30 mm
3114	9.500 g	175 cm	30 mm
3115	11.000 g	200 cm	30 mm

Crowbar with curved base

Item no.	Weight	Length	Diameter
3122	4.750 g	125 cm	25 mm
3123	8.000 g	150 cm	30 mm
3124	9.500 g	175 cm	30 mm
3125	11.000 g	200 cm	30 mm

Crowbar with chisel

Item no.	Weight	Length	Diameter
3102	4.750 g	125 cm	25 mm
3103	8.000 g	150 cm	30 mm
3104	9.500 g	175 cm	30 mm
3105	11.000 g	200 cm	30 mm

Crowbar, edged

Item no.	Weight	Length	Diameter
3002	6.500 g	125 cm	30 mm
3003	8.500 g	150 cm	35 mm
3004	10.000 g	175 cm	35 mm
3005	12.000 g	200 cm	40 mm

Crowbar with ball head and tip

Item no.	Weight	Length	Diameter
2503	7.000 g	125 cm	30 mm
2504	8.500 g	150 cm	30 mm

Crowbar with ball head and cutting edge

Item no.	Weight	Length	Diameter
2511	7.000 g	125 cm	30 mm
2512	8.500 g	150 cm	30 mm

Ice pushers

\*Length of the handle

Ice pusher

Item no.	Weight	Length*	Handle
3401	1.800 g	130 cm	Shaft (Ash)

Ice pusher

Item no.	Weight	Length*	Handle
3411	1.600 g	130 cm	Shaft (Ash)

Snow shovels

Snow shovel, plywood

Item no.	Weight	Length*	Handle
7604	1.800 g	130 cm	Shaft (Ash)

Snow shovel, aluminium

Item no.	Weight	Length*	Handle
7603	2.000 g	130 cm	Shaft (Ash)

Hand excavator

Hand excavator

Item no.	Weight	Length*	Handle
6101	6.000 g	90 cm	Shaft (Ash)
6102	6.500 g	100 cm	Shaft (Ash)

Planting hand excavator

Item no.	Weight	Length*	Handle
1350	1.660 g	80 cm	Shaft (Ash)

Forks

\*Length of the handle

Manure fork, rail collar

Item no.	Weight	Length*	Handle
9905	1.500 g	135 cm	Shaft (Ash)
9922	1.700 g	135 cm	Shaft (Ash)

Hay fork, rail collar

Item no.	Weight	Length*	Handle
9904	1.450 g	135 cm	Shaft (Ash)

Manure fork, spring grommet

Item no.	Weight	Length*	Handle
9985	1.580 g	135 cm	Shaft (Ash)

Hay fork, spring grommet

Item no.	Weight	Length*	Handle
9984	1.550 g	135 cm	Shaft (Ash)

Bale fork, grommet

Item no.	Weight	Length*	Handle
9920	1.300 g	135 cm	Shaft (Ash)

Horse manure fork, grommet

Item no.	Weight	Length*	Handle
9927	1.700 g	135 cm	Shaft (Ash)

Spade fork, rail collar

Item no.	Weight	Length*	Handle
0401	1.600 g	95 cm	T-Shaft (Ash)
0406	1.580 g	95 cm	Button-Shaft (Ash)

# The future needs origin.

Our philosophy

By bringing together different aspects and requirements, new ideas and innovative tools are created that not only meet the technical requirements, are manufactured to a high standard and could almost pass as a design object, but are also adapted to the physiological movement sequences of the human body.

Find out more about our philosophy at:  
[www.krumpholz1799.de/225-jahre](http://www.krumpholz1799.de/225-jahre)

# Forestry tools

Krumpholz-Werkzeuge has a long tradition in the manufacture of high quality forestry tools. The axes for felling and limbing are hand-forged from boron steel and fitted with a high-quality hickory or ash handle. A leather edge guard and leather handle guard are also available on request.

▶ Axes with leather protection	130
▶ Axes with drive head and leather protection	132
▶ Universal hatchets	134
▶ Universal axes	134
▶ Felling and pruning axes	136
▶ Splitting axes with leather protection	140
▶ Splitting axes	143
▶ Splitting hammers	143
▶ Splitting wedges	145
▶ Pickaroons	146
▶ Pickaroon axes	146
▶ Lifting and towing pliers	148
▶ Outdoor axe	148
▶ Woodworking	149
▶ Billhooks	149

## High-quality protection for your forestry tools

Forestry tools play a crucial role in the maintenance and preservation of forests and in timber harvesting. Protecting these tools is of great importance, as they are not only expensive investments, but also contribute signifi-

cantly to the safety and efficiency of the work. Protecting them with high-quality materials such as leather extends the life of the tools, preserves their functionality and minimizes the risk of damage or injury during work. Ultima-

tely, preserved tools mean less downtime, greater safety and better performance in forest management and forestry work.

The blade guard of our Forestry tools is hand-sewn and made of genuine leather. It is ideal for preventing injuries caused by the sharply ground cutting edge and protecting it from blunting, knocks and scratches.

The leather handle guard made of genuine cowhide

has enormous advantages compared to a metal handle guard. The handmade leather protection protects the handle from damage that occurs when it comes into contact with the wood.

At the same time, it can be pulled off the handle with a small grip so that the wood can breathe and dry.

This prevents the handle from rotting and prevents moisture from collecting under the handle protector.

If I had eight hours to  
chop down a tree, I  
would spend six hours  
grinding the axe.

Abraham Lincoln

We offer a wide range of high-quality universal and splitting axes - each one tailored to the physiological requirements of weight, robustness and handling. So you are guaranteed to find the axe that suits your requirements.

Axes with leather protection

\*Length of the handle

Gardening hatchet

Item no.	Head wt.	Length*	Handle	Total wt.

# Safety for forestry work

The „must-have“ for real forestry work: With these axes and splitting hammers, a polymer impact surface absorbs the impact, which not only significantly reduces the noise level but also the significantly reduces the risk of metal splintering and increases the service life of the wedges.

Light, sharp  
& handy

The classic garden hatchet is ideal for pruning and making kindling. The hand-forged axe edge made of high-quality steel and a high-quality ash or hickory handle ensure stability and a long service life. The garden hatchet can be supplied with a leather leather blade guard and the matching belt buckle.

A person wearing a dark blue long-sleeved shirt is using a splitting hammer to split a large, weathered log. The hammer has a wooden handle and a metal head. Wood chips are flying through the air as the hammer strikes the log. The background is a lush green field.

# If you want to keep a good fire, you first have to split the coarse wood.

Johann Nepomuk Vogl

To minimize the effort required when splitting wood, you should use special splitting axes, splitting wedges and splitting hammers. Their properties make them perfect for splitting wood. Our hand-forged splitting tools meet the highest standards of quality and ergonomics.

Splitting axes with leather protection & cutting edge protection

\*Length of the handle

Super splitting axe

Enormous power  
transmission

To minimize the effort required, you should use special splitting axes when splitting wood. Their sharp cutting edge penetrates the wood easily and the wedge-shaped, widening head shape is ideal for pushing the wood apart. The grooves on the sides of the the sides of the axe head reduce friction, improve guidance and push the wood apart guidance and push the wood apart more effectively.

Fig. item no.: 0523 (with leather protection 0373)

Always perfectly  
protected

To protect the handle when splitting wood, our splitting axes can be fitted with a matching leather guard on request, which is easy to remove.

Fig. item no.: 0373

A tradition of quality since 1799.

# Effective power transmission

Splitting wedges are available in various shapes, sizes and designs. The wedge surfaces are scaled on the sides or provided with grooves and ridges to achieve a better effect. Rotary splitting wedges are a special type which, thanks to their twist, transfer the force of the impact even more effectively into the wood and significantly increase their splitting effect due to the wider wedge angle.

Having the wood  
under control

As an extension of your own „contact surface“, the Sappie makes it easier to move and drag pieces of wood around. The reduced use of force is easy on your muscles and back. Simply drive the tip into the wood and you have it completely under control. A lying log can be pulled, lifted or turned with a hammered-in tip.

# Our sales displays

On customer request, our tools are supplied in special sales and presentation displays. The displays, which are primarily made for garden centers, are assembled according to customer requirements and equipped with various tools.

The number of displays is generally unlimited. They can be set up from 3 meters in length, but 20-meter tool walls are also possible without duplicating a tool. The selection of tools depends on the customer's requirements and is supplemented by our experience with various tools.

On request, it is possible to plan and build individual custom-made complete tool walls or smaller presentation options. Alternatively, existing walls made of TEGO metal can also be fitted with tools.

To ensure the greatest possible satisfaction and customer proximity, we deliver our tools within Europe using our own truck wherever possible.

# Reference solutions

As a retailer, you benefit from our customized service. We support your product presentation with sales displays, catalogs, flyers, posters, advertising banners or other advertising materials. Are you interested in including our tools in your product range and becoming an ambassador for the Krumpholz brand? We would be happy to show you the possibilities and make you an individual offer. We look forward to getting in touch with you.

### 1. Acceptance of the conditions of sale

The following terms and conditions apply to all sales. Any deviations or verbal agreements require our written confirmation.

### 2. Offer

All offers are non-binding for us.

### 3. Prices

Prices are quoted in EURO and are subject to change, excluding shipping and packaging costs.

### 4. Packaging

Some items are delivered in special packaging. We reserve the right to round your order up or down to the next higher or lower packaging unit.

### 5. Delivery time

Delivery times are given to the best of our knowledge, but without guarantee. Agreed delivery periods shall commence on the day the order is accepted. Events of force majeure shall entitle us to postpone delivery for the duration of the hindrance. Force majeure also includes circumstances that make delivery considerably more difficult or impossible for us. Claims for damages against us are excluded.

### 6. Guarantee

We grant a guarantee on our tools. However, this only covers manufacturing or material defects. We accept no liability for damage caused by improper use. Any other claims, in particular claims for damages, are excluded.

### 7. Terms of payment

If the target is exceeded, interest on arrears will be charged at the standard commercial interest rate.

### 8. Retention of title

All goods delivered by us shall remain our property until full payment has been made.

### 9. Place of performance and jurisdiction for delivery and payment is Kulmbach

### 10. The above conditions shall remain in force even if one or more of them become ineffective

### 11. Terms of delivery

Delivery is optional:

- a) free domicile from 1,250.00 Euro net
- b) ex works
